

“We

*are the first generation
to directly feel the effects
of global warming and
the last Generation that
can do anything about it.”*

United Nations Sunday, October 19, 2014 at the Unitarian Society of Germantown,

The distinguished **Jan Dash, PhD**, Unitarian, New York University professor; U.N. NGO Committee on Sustainable Development; U.S. EPA advisor; Head, UUUNO , Global Warming Committee and prolific author will be our speaker. The 11 a.m. service will be followed at 1 p.m. by three panels:

- One by Dr. Dash on the carbon cycle;
- another on water and global warming, with Christiaan Morssink and students from the Philadelphia Global Water Initiative;
- and the third on women’s issues and climate change with Lyn Dash, activist and wife of the main speaker.

We invite students from local colleges and universities to be our guests at the Unitarian Society of Germantown, 6511 Lincoln Drive, Philadelphia, Pa. 19119. 11 a.m.

Spurred by the enthusiasm of youth and the expertise of our speakers, we expect that the talks will help the congregation and our guests become more active in their efforts to protect the planet, revving up our Green Sanctuary Movement and gaining a deeper understanding of the spiritual as well as economic and social dimensions of the Global Warming issue.

For more information, go to the USG, UUUNO Web page (<http://usguu.org/>), or contact Mariettan@aol.com.
