Let's talk  
***Climate Change: Climate action***  
**What we can do, must do, here and everywhere.**

The warming of oceans, the greenhouse gases in the atmosphere, the human impact on the warming of the surface of our planet; the forecasts are dire and the need for concerted action is immediate. The UN is sounding the alarm bell. Our children are marching and demand action!!! How to change our ways of living, of building and moving and eating. How can we use technology, law, taxations, subsidies and plain old education to make acute change happen? Develop alternatives to our ways of living and demand the same from our companies and governments. Can the sanctuary city of Philadelphia stand strong and lead the nation in tackling the local climate change revolution?

**Goal: To make Philadelphia a global example of how to engage positively on climate change**
